

Intel[®] 845 Chipset: 82845 Memory Controller Hub (MCH) for DDR

Specification Update

May 2002

Notice: The Intel[®] 82845 MCH for DDR may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are documented in this Specification Update.

Document Number: 298603-003

Information in this document is provided in connection with Intel® products. No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document. Except as provided in Intel's Terms and Conditions of Sale for such products, Intel assumes no liability whatsoever, and Intel disclaims any express or implied warranty, relating to sale and/or use of Intel products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right. Intel products are not intended for use in medical, life saving, or life sustaining applications.

Intel may make changes to specifications and product descriptions at any time, without notice.

Designers must not rely on the absence or characteristics of any features or instructions marked "reserved" or "undefined." Intel reserves these for future definition and shall have no responsibility whatsoever for conflicts or incompatibilities arising from future changes to them.

The Intel® 82845 MCH for DDR may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Contact your local Intel sales office or your distributor to obtain the latest specifications and before placing your product order.

Revision History

Rev.	Draft/Changes	Date
-001	Initial Release.	January 2002
-002	(1) Errata #1 removed. This errata does not apply to the production stepping of the 82845 MCH for DDR and was initially entered as an errata by mistake. (2) Errata #2 removed. This errata does not apply to the production stepping of the 82845 MCH for DDR and was initially entered as an errata by mistake.	February 2002
-003	Added Documentation Change #1, Changed Section 5.3.6, AGP FRAME# Transactions on AGP.	May 2002

Preface

This document is an update to the specifications contained in the documents listed in the following Affected Documents/Related Documents table. It is a compilation of device and document errata and specification clarifications and changes, and is intended for hardware system manufacturers and for software developers of applications, operating system, and tools.

Information types defined in the Nomenclature section of this document are consolidated into this update document and are no longer published in other documents. This document may also contain information that has not been previously published.

Affected Documents/Related Documents

Document Title	Document Number
<i>Intel® 845 Chipset: 82845 Memory Controller Hub (MCH) for DDR Datasheet</i>	298604-001

Nomenclature

Specification Changes are modifications to the current published specifications. These changes will be incorporated in the next release of the specifications.

Errata are design defects or errors. Errata may cause the behavior of the Intel 82845 MCH for DDR to deviate from published specifications. Hardware and software designed to be used with any given stepping must assume that all errata documented for that stepping are present on all devices.

Specification Clarifications describe a specification in greater detail or further highlight a specification's impact to a complex design situation. These clarifications will be incorporated in the next release of the specifications.

Documentation Changes include typos, errors, or omissions from the current published specifications. These changes will be incorporated in the next release of the specifications.

Component Identification via Programming Interface

The Intel 82845 MCH for DDR may be identified by the following register contents:

Stepping	Vendor ID ¹	Device ID ²	Revision Number ³
B0	8086h	1A30h	04h

NOTES:

1. The Vendor ID corresponds to bits 15:0 of the Vendor ID Register located at offset 00–01h in the PCI function 0 configuration space.
2. The Device ID corresponds to bits 15:0 of the Device ID Register located at offset 02–03h in the PCI function 0 configuration space.
3. The Revision Number corresponds to bits 7:0 of the Revision ID Register located at offset 08h in the PCI function 0 configuration space.

Component Marking Information

The Intel 82845 MCH for DDR may be identified by the following component markings:

Stepping	Q-Spec	S-Spec	Top Marking	Notes
B0	QC59ES	SL5YQ	RG82845	

Summary Table of Changes

The following table indicates the Specification Changes, Errata, Specification Clarifications or Documentation Changes that apply to the listed Intel 82845 MCH for DDR steppings. Intel intends to fix some of the errata in a future stepping of the component and to account for the other outstanding issues through documentation or Specification Changes as noted. This table uses the following notations:

Codes Used in Summary Table

- X: Erratum, Specification Change or Clarification that applies to this stepping.
- Doc: Document change or update that will be implemented.
- Fix: This erratum is intended to be fixed in a future stepping of the component.
- Fixed: This erratum has been previously fixed.
- NoFix There are no plans to fix this erratum.
- (No mark) or (Blank Box): This erratum is fixed in listed stepping or specification change does not apply to listed stepping.

Shaded: This item is either new or modified from the previous version of the document

NO.	SPECIFICATION CHANGES
	There are no specification changes in this Specification Update revision

NO.	B0	PLANS	ERRATA
			There are no errata in this Specification Update revision.

NO.	SPECIFICATION CLARIFICATIONS
	There are no specification clarifications in this Specification Update revision

NO.	DOCUMENTATION CHANGES
1	Changed Section 5.3.6, AGP FRAME# Transactions on AGP.

This page is intentionally left blank.

Specification Changes

There are no specification changes in this Specification Update revision.

This page is intentionally left blank.

Errata

There are no errata in this Specification Update Revision.

This page is intentionally left blank.

Specification Clarifications

There are no specification clarifications in this Specification Update revision.

This page is intentionally left blank.

Documentation Changes

1. Changed Section 5.3.6, AGP FRAME# Transactions on AGP

Section 5.3.6, AGP FRAME# Transactions on AGP, is changed as follows. Beneath Note 1 of Table 17, PCI Commands Supported by the Intel® MCH (When Acting as a FRAME# Target), is a series of bullets defining memory transactions when the MCH is a target of an AGP FRAME# cycle. The first bullet is changed to two bullets. The two new bullets read:

- *Memory Read*. Recommended for reads of 32 bytes or less.
- *Memory Read Line, and Memory Read Multiple*. These commands are supported identically by the MCH and allow the MCH to continuously supply data during MRL and MRM burst. Recommended for reads of more than 32 bytes. The MCH does not support reads of the hub interface bus from AGP.
