***Preliminary CIR Programming Guide V0.1***

Notice: The information provided in this publication is believed to be accurate. Integrated circuits sold by ITE are covered by the warranty and patent indemnification provisions stipulated in the terms ITE Terms and Conditions of Sale, as revised from time to time. ITE makes no warranty, expressed, statutory, implied, or by description, regarding the information in this publication or regarding the freedom of the described chip(s) from patent infringement, except as specifically provided in the ITE Terms and Conditions of Sale. Furthermore, ITE makes no warranty of merchantability or fitness for any purpose. ITE reserves the right to halt production or modify specifications and prices at any time without notice. Accordingly, the reader is cautioned to verify that the specification and other information included in this publication is current before placing product orders.

Products described herein are intended for use in normal commercial applications. Applications involving unusual environment or reliability requirements (e.g., military equipment or medical life-support equipment) are specifically not recommended without additional processing by ITE for such applications. All trademarks are the sole property of their respective owners.

**1. Overview**

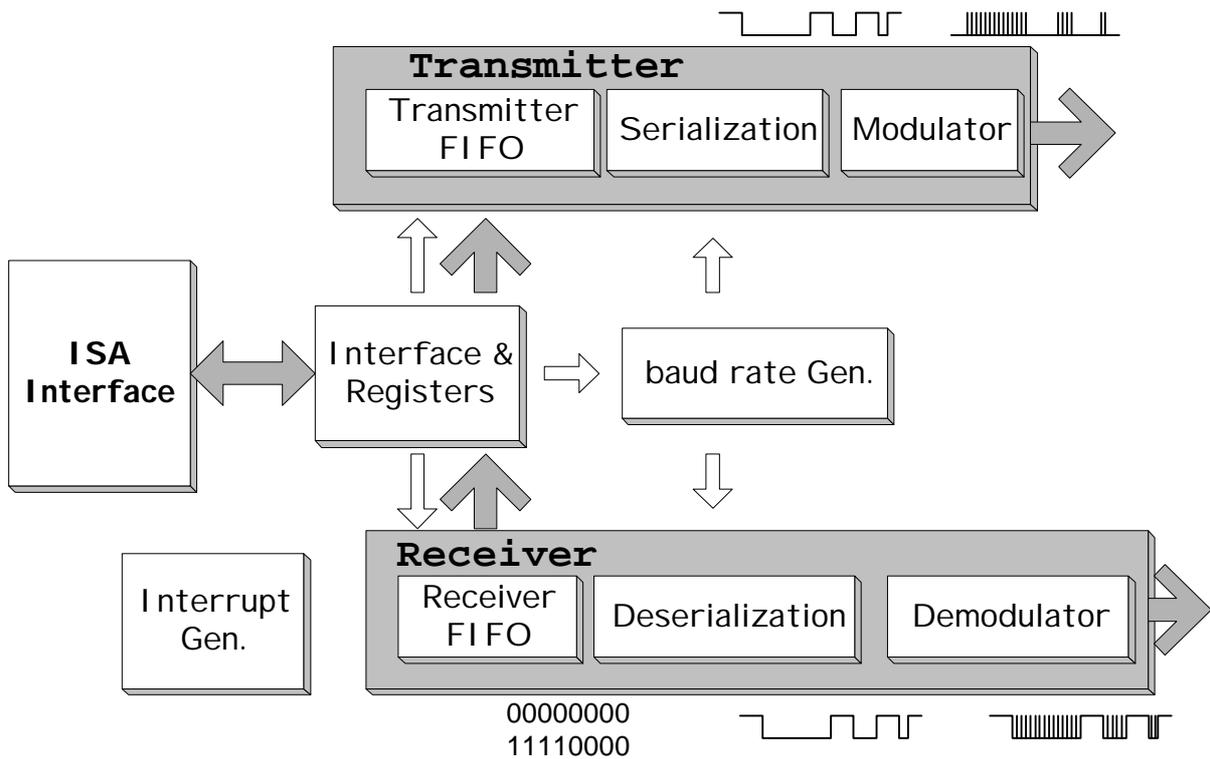

The CIR driver consists of three main elements: User Interface, protocol decode, and device driver control. Diagram 1 below illustrates the working relationship among the three elements. The gray area – CIR device control module, is the focused discussion that will be covered in the document hereafter.

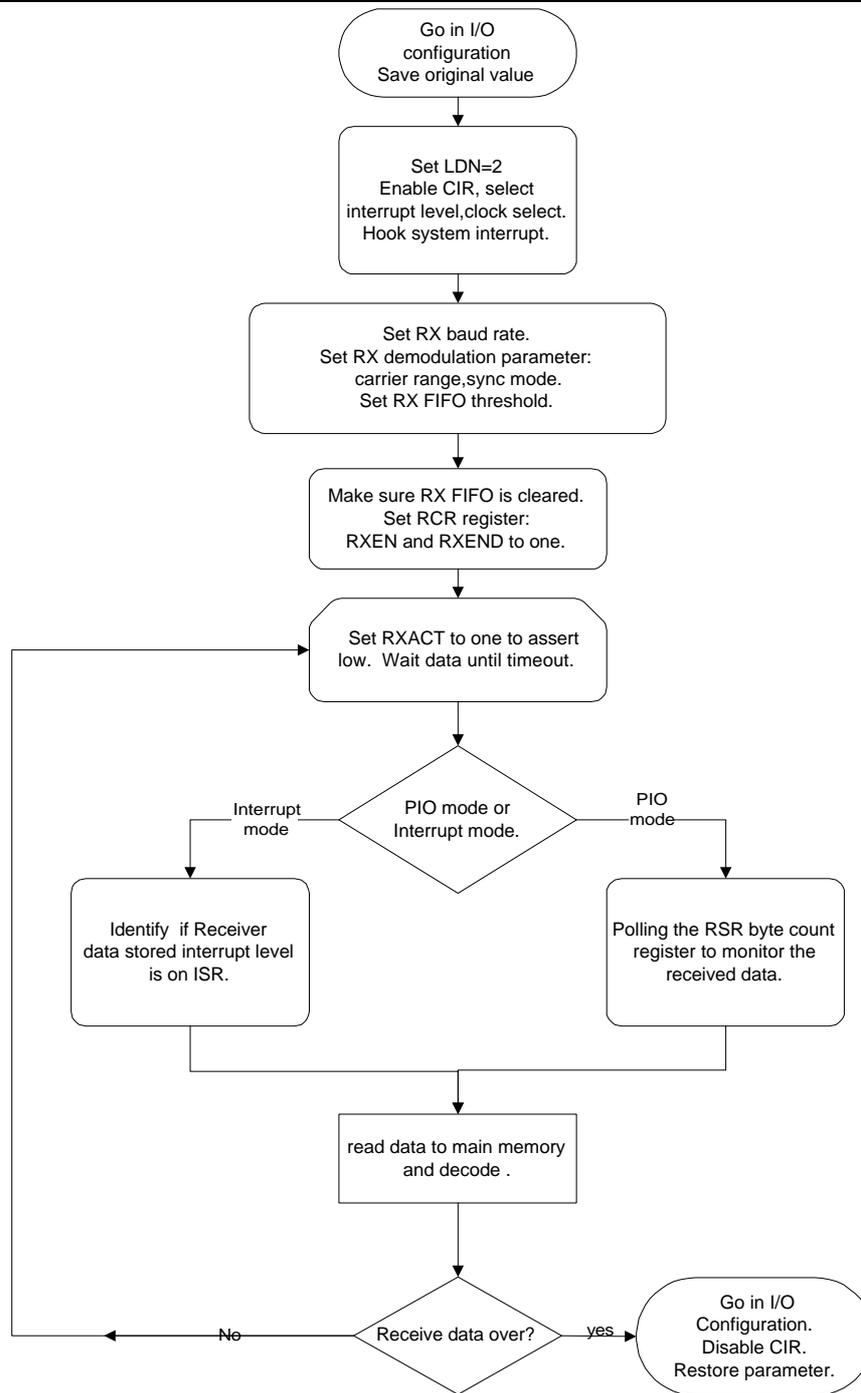

**Figure 1-1. CIR Block Diagram**

**2. Flow Chart**

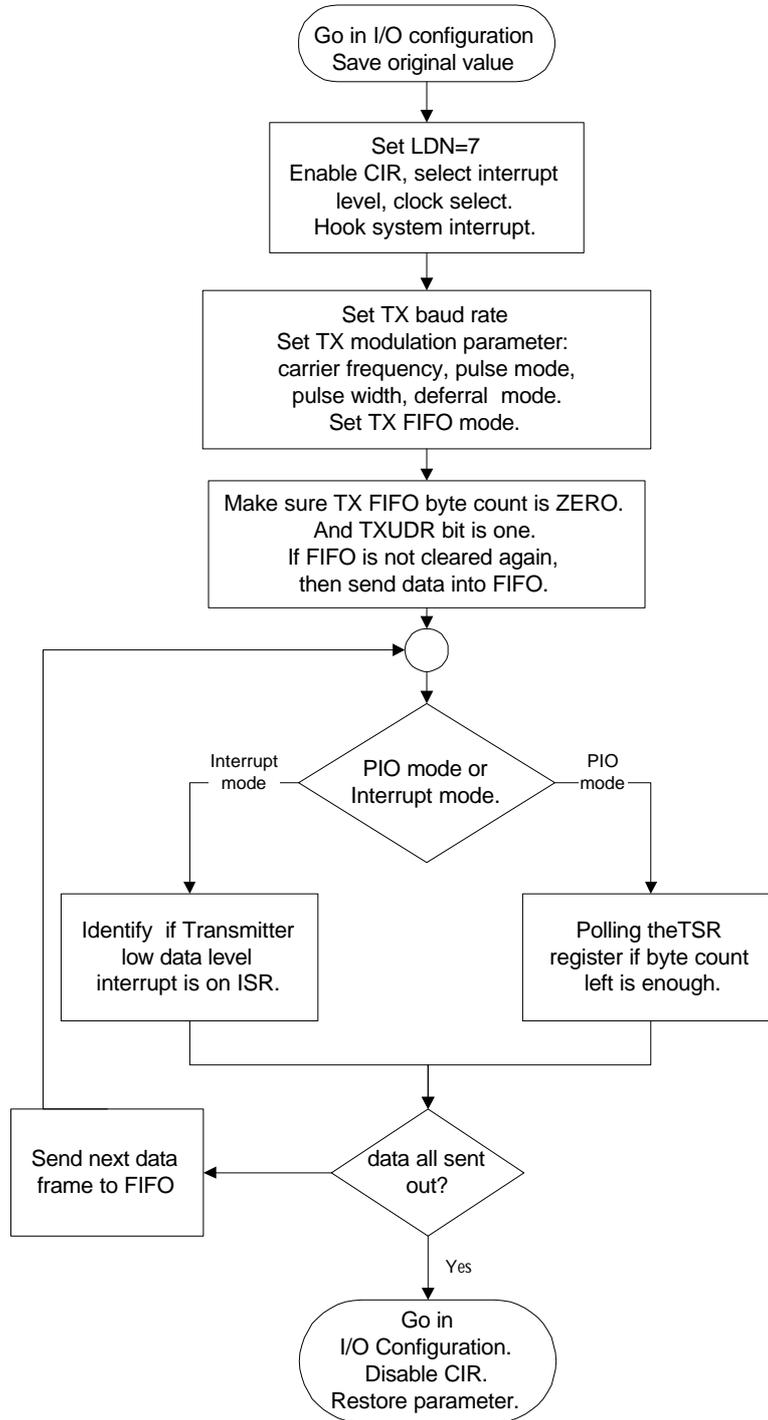

After the user interface are dealt and the decode argument of the desired protocol are completed, the CIR register in CIR module must be set to enable the transferred data send /receive to/from the CIR FIFO. Figure 2-1 below illustrates the CIR module mechanism. TX /RX coding flow charts are illustrated respectively in Figure 2-2 and Figure 2-3 on the next pages.

**Figure 2-1. CIR Module Mechanism**

**Figure 2-2. CIR RX Flow Chart**

**Figure 2-3. CIR TX Flow Chart**

### 3. Programming Guide

- a. **Set configuration registers:** The configuration registers must be set first: set LDN=07h, Active the Consumer IR. Select the base address from Consumer IR Base Address MSB register (Index: 60h) and Base Address LSB register (Index=61h). Select the CIR interrupt level from the register of Consumer IR Interrupt Level Select (Index: 70h). Make sure to hook the operation system interrupt and create the interrupt service routine too.

**Table 3-1. Consumer IR Configuration Registers**

LDN	Index	R/W	Reset	Configuration Register or Action
07h	30h	R/W	00h	Consumer IR Activate.
07h	60h	R/W	03h	Consumer IR Base Address MSB Register.
07h	61h	R/W	10h	Consumer IR Base Address LSB Register.
07h	70h	R/W	0Bh	Consumer IR Interrupt Level Select.
07h	F0h	R/W	00h	Consumer IR Special Configuration Register.

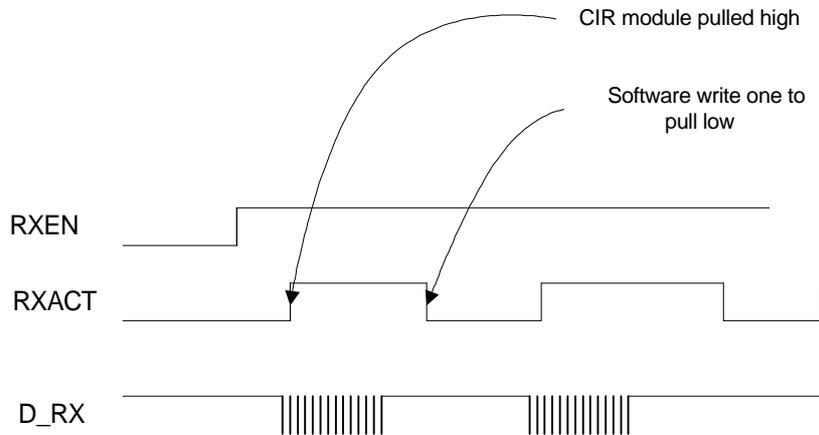

b. **Set CIR Registers:**

TX: baud rate, frequency, pulse width, pulse mode, deferral mode, RLE mode and FIFO threshold.  
 RX: Baud rate frequency range, sync mode and FIFO threshold.

c. **Begin to Transmit/Receive Data:**

TX: Before transmitting any data, the TX FIFO must be cleared first. The device then starts to transmit one frame data into the FIFO. During data transmit, the TX FIFO byte count must be monitored closely to ensure the byte count is remained below the maximum FIFO value, for FIFO to receive further data. It is recommended to clear the FIFO data before the next frame data transmission can be started.

RX: Before transmitting any data, the RX FIFO must be cleared first. RXEN and RXEND are then enabled, and RXACT is asserted low by writing one to clear this bit, as illustrated in the diagram on the next page.

**Figure 3-1. RXACT Relationship**

After asserting RXACT low, the device waits data to enter FIFO for data receive. CIR mechanism will perform demodulation when the RX data bits become low. It indicates that the first bit of data frame must be a low bit to simulate CIR mechanism. In PIO mode, the data are received when the byte count value does not equal zero. In interrupt mode, the data are received during interrupt service routine when FIFO data go beyond the threshold, causing an interrupt to occur. After one frame data are received, RXACT will be asserted low by writing one to the bit. The CIR will not stop the demodulation by itself and will transmit 0xff continuously to FIFO if RXACT is not asserted low.

**d. Stop TX/RX Action:**

**TX:** After all frame data transmissions have been completed, several steps need to follow to stop the TX action: (1) disable the CIR in the configuration register; (2) restore the original setting; (3) unhook the interrupt.

**RX:** If further data reception is not required, several steps are required to disable the interrupt switch: (1) disable the CIR in the configuration register; (2) restore the original setting; (3) unhook the interrupt.

**e. Register Description:**

**Register 0: DR**

Bit	7	6	5	4	3	2	1	0
<b>Bit Name</b>	DR[7:0]							
<b>Initial Value</b>	FF							
<b>R/W</b>	Rx/Tx							

**Register 1: IER**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	TM_EN	-	RESET	BR	IEE	RFOIE	RDAIE	TLDLIE
<b>Initial Value</b>	0	-	0	0	0	0	0	0
<b>R/W</b>	R/W	-	R/W	R/W	R/W	R/W	R/W	R/W

Do not set TM\_EN (Test Mode Enable) bit to one

If bits IRFOV\_EN, IRDS\_EN or ITLTL\_EN need to be set to one, IEE must set to one too.

If bit 5 Reset is set to one, all values will be reset to default values

**Register 2: RCR**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	RDWOS	HCFS	RXEN	RXEND	RXACT	RXDCRG[2:0]		
<b>Initial Value</b>	0	0	0	0	0	0	0	1
<b>R/W</b>	R/W	R/W	R/W	R/W	R/W	R		

Write one to clear bit 3 RXACT.

**Register 3: TCR1**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	FIFOCLR	ILE	FIFOTL[1:0]		TXRLE	TXENDF	TXPM[1:0]	
<b>Initial Value</b>	0	0	0	0	0	0	0	
<b>R/W</b>	R/W	R/W	R/W	R/W	R/W	R/W	R/W	

Write 1 to enable bit 7 FIFOCLR.

**Register 4: TCR2**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	CFQ[4:0]					TXPW[2:0]		
<b>Initial Value</b>	0	1	0	1	1	1	0	0
<b>R/W</b>	R/W	R/W	R/W	R/W	R/W	R/W	R/W	R/W

**Register 5: TSR**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	-	--	TXFBC[5:0]					
<b>Initial Value</b>	-	-	0					
<b>R/W</b>	-	-	R					

**Register 5: BRDL**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	BRDL[7:0]							
<b>Initial Value</b>	0							
<b>R/W</b>	R/W							

Baud rate divisor = 115200/baud rate.

**Register 6: RSR**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	RXFTO	--	RXFTO[5:0]					
<b>Initial Value</b>	0	-	0					
<b>R/W</b>	R	-	R					

**Register 6: BRDH**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	BRDH[7:0]							
<b>Initial Value</b>	0							
<b>R/W</b>	R/W							

**Register 7: IIR**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	-	-	-	-	-	IID1	IID0	IIP
<b>Initial Value</b>	-	-	-	-	-	0	0	1
<b>R/W</b>	-	-	-	-	-	R	R	R

IID[1:0]:

- 00: No interrupt.
- 01: Transmitter Low Data Level Interrupt.
- 10: Receiver Data Stored Interrupt.
- 11: Receiver FIFO Overrun Interrupt.

**Register 7: TM**

<b>Bit</b>	7	6	5	4	3	2	1	0
<b>Bit Name</b>	IL_SEL	-	Test Mode Reg[5:0]					
<b>Initial Value</b>	0	-	0					
<b>R/W</b>	R/W	-	R/W					

Please note that baud rate must be no less than 4 times of carrier signal frequency.

Ex: Baud rate=9600 → 1/9600=104.2us.

Carrier frequency=35kHz → 1/35kHz=28.6us

28.6us \* 4 > 104.2us. → It may **not** work properly.

Baud rate divisor=115200/baud rate.

Ex1. 2400bps → 115200/2400=48 → 48(d)=0030(h)

BDHR=00(h), BDLR=30(h)

Ex2. bit width=0.565ms → 1770bps → 115200/1770=65(d)=41(h)

BDHR=00(h), BDLR=41(h).

**Table 3-2. Receiver Demodulation Low Frequency (HFC = 0)**

11111	58kHz	-

### f. Power-on Setting:

Just like turning on a television set, you can use a transmitter to power on the computer via the following setting.

1. See Table 3-5. In LDN=04h setting, Index (30h) Bit 0 and Index (F0h) Bit 0 must be on to enable the CIR power-on function.
2. In LDN=04h setting, Index (F5h)=0x20, Index (F6h)=CIR code byte count.  
 CIR code byte count format → Wake up sleeping mode's byte count decrease 3: short code bits [7:4].  
 Power-on mode's byte count decrease 3: long code bits[3:0].
3. Setting Index (F5h)=01h, Index (F6h)=1<sup>st</sup> key code pattern.  
 Index (F5h)=02h, Index (F6h)=2<sup>nd</sup> key code pattern.

....  
 . ....

EX:

```

Outputb(cfg_index,0xf5);
Outputb(cfg_data ,0x20);
Outputb(cfg_index,0xf6);
Temp=(ShortByteCount-3)+((LongByteCount-3)<<4);
Outputb(cfg_data,Temp)

```

4. Setting the CIR register at receiving data mode according to Figure 2-2. CIR RX Flow Chart.  
 Then you can power on the computer by CIR transmitter, and see if in LDN=04h Index (F1h) Bit 0 is on as a re-check.

**Table3-5. Environment Controller Configuration Registers**

LDN	Index	R/W	Reset	Configuration Registers or Action
04h	30h	R/W	00h	Environment Controller Activate
04h	60h	R/W	02h	Environment Controller Primary Base Address MSB Register
04h	61h	R/W	90h	Environment Controller Primary Base Address LSB Register
04h	62h	R/W	02h	PME Direct Access Base Address MSB Register
04h	63h	R/W	30h	PME Direct Access Base Address LSB Register
04h	70h	R/W	09h	Environment Controller Interrupt Level Select
04h	F0h	R/W	00h	APC/PME Event Enable Register
04h	F1h	R/W	00h	APC/PME Status Register
04h	F2h	R/W	00h	APC/PME Control Register 1
04h	F3h	R/W	00h	Environment Controller Special Configuration Register
04h	F4h	R-R/W	00h	APC/PME Control Register 2
04h	F5h	R/W	-	APC/PME Special Code Index Register
04h	F6h	R/W	-	APC/PME Special Code Data Register

## INTEGRATED TECHNOLOGY EXPRESS, INC. TERMS AND CONDITIONS OF SALE(Rev: May98)

These Terms and Conditions of Sale apply to all items designed, sold and/or made by Integrated Technology Express, Inc. ("ITE Taiwan") and/or Integrated Technology Express, Inc. ("ITE California"), and Buyer agrees they apply to all such items.

### 0. PARTIES

ITE Taiwan is a company headquartered in the Republic of China, Taiwan, and incorporated under Taiwan law, and ITE California is a separate company incorporated under California law and headquartered in California. These two companies are independent, and, except as to the entity which invoices for goods delivered to it, Buyer holds no rights against and has no commitments from ITE California and/or ITE Taiwan. Subject to the foregoing, "Seller" refers to the entity which invoices Buyer for product, provided however that both ITE Taiwan and ITE California shall each be entitled to claim protection under paragraphs 4(b)-4(f), 5, 8, 9, 10, 11, 12 and 13 below.

### 1. ACCEPTANCE OF TERMS

BUYER ACCEPTS THESE TERMS (i) BY WRITTEN ACCEPTANCE (BY PURCHASE ORDER OR OTHERWISE), OR (ii) BY FAILURE TO RETURN GOODS DESCRIBED ON THE FACE OF THE PACKING LIST WITHIN FIVE DAYS OF THEIR DELIVERY.

### 2. DELIVERY

- Delivery will be made Free Carrier (Incoterms), Seller's warehouse, Science-Based Industrial Park, Taiwan (if Seller is ITE Taiwan or ITE California) or Santa Clara, California (if Seller is ITE California).
- Title to the goods and the entire risk will pass to Buyer upon delivery to carrier.
- Shipments are subject to availability. Seller shall make every reasonable effort to meet the date(s) quoted or acknowledged; and if Seller makes such effort, Seller will not be liable for any delays.

### 3. TERMS OF PAYMENT

- Terms are as stated on Seller's quotation, or if none are stated, net thirty (30) days. Accounts past due will incur a monthly charge at the rate of one percent (1%) per month (or, if less, the maximum allowed by applicable law) to cover servicing costs.
- Seller reserves the right to change credit terms at any time in its sole discretion.

### 4. LIMITED WARRANTY

- Seller warrants that the goods sold will be free from defects in material and workmanship and comply with Seller's applicable published specifications for a period of ninety (90) days from the date of Seller's delivery.
- Goods or parts which have been subject to abuse (including without limitation repeated or extended exposure to conditions at or near the limits of applicable absolute ratings) misuse, accident, alteration, neglect, or unauthorized repair or improper application are not covered by any warranty. No warranty is made with respect to custom products or goods produced to Buyer's specifications (unless specifically stated in a writing signed by Seller).
- No warranty is made with respect to goods used in devices intended for use in applications where failure to perform when properly used can reasonably be expected to result in significant injury (including, without limitation, navigation, aviation or nuclear equipment, or for surgical implant or to support or sustain life) and Buyer agrees to indemnify, defend, and hold harmless Seller from all claims, damages and liabilities arising out of any such uses.
- This Paragraph 4 is the only warranty by Seller with respect to goods and may not be modified or amended except in writing signed by an authorized officer of Seller.
- Buyer acknowledges and agrees that it is not relying on any applications, diagrams or circuits contained in any literature, and Buyer will test all parts and applications under extended field and laboratory conditions. Notwithstanding any cross-reference or any statements of compatibility, functionality, interchangeability, and the like, the goods may differ from similar goods from other vendors in performance, function or operation, and in areas not contained in the written specifications, or as to ranges and conditions outside such specifications; and Buyer agrees that there are no warranties and that Seller is not responsible for such things.
- EXCEPT AS PROVIDED ABOVE, SELLER MAKES NO WARRANTIES OR CONDITIONS, EXPRESS, IMPLIED, OR STATUTORY; AND SELLER EXPRESSLY EXCLUDES AND DISCLAIMS ANY WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE OR APPLICATION.

### 5. LIMITATION OF LIABILITY

- Seller will not be liable for any loss, damage or penalty resulting from causes beyond its reasonable control, including but not limited to delay by others, force majeure, acts of God, or labor conditions. In any such event, the date(s) for Seller's performance will be deemed extended for a period equal to any delay resulting.
- THE LIABILITY OF SELLER ARISING OUT OF THE CONTRACT OR ANY GOODS SOLD WILL BE LIMITED TO REFUND OF THE PURCHASE PRICE OR REPLACEMENT OF PURCHASED GOODS (RETURNED TO SELLER FREIGHT PRE-PAID) OR, WITH SELLER'S PRIOR WRITTEN CONSENT, REPAIR.
- Buyer will not return any goods without first obtaining a customer return order number.
- AS A SEPARATE LIMITATION, IN NO EVENT WILL SELLER BE LIABLE FOR COSTS OF SUBSTITUTE GOODS; FOR ANY SPECIAL, CONSEQUENTIAL, INCIDENTAL OR INDIRECT DAMAGES; OR LOSS OF USE, OPPORTUNITY, MARKET POTENTIAL, AND/OR PROFIT ON ANY THEORY (CONTRACT, TORT, FROM THIRD PARTY CLAIMS OR

OTHERWISE). THESE LIMITATIONS SHALL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDY.

- No action against Seller, whether for breach, indemnification, contribution or otherwise, shall be commenced more than one year after the cause of action has accrued, or more than one year after either the Buyer, user or other person knew or with reasonable diligence should have known of the matter or of any claim of dissatisfaction or defect involved; and no such claim may be brought unless Seller has first been given commercially reasonable notice, a full written explanation of all pertinent details, and a good faith opportunity to resolve the matter.
- BUYER EXPRESSLY AGREES TO THE LIMITATIONS OF THIS PARAGRAPH 5 AND TO THEIR REASONABLENESS.

### 6. SUBSTITUTIONS AND MODIFICATIONS

Seller may at any time make substitutions for product ordered which do not materially and adversely affect overall performance with the then current specifications in the typical and intended use. Seller reserves the right to halt deliveries and shipments and alter specifications and prices without notice. Buyer shall verify that the literature and information is current before purchasing.

### 7. CANCELLATION

- The contract may not be canceled by Buyer except with written consent by Seller and Buyer's payment of reasonable cancellation charges (including but not be limited to expenses already incurred for labor and material, overhead, commitments made by Seller, and a reasonable profit).
- In no event will Buyer have rights in partially completed goods.

### 8. INDEMNIFICATION

Seller will, at its own expense, assist Buyer with technical support and information in connection with any claim that any parts as shipped by Seller under this purchase order infringe any valid and enforceable copyright, or trademark, provided however, that Buyer (i) gives immediate written notice to Seller, (ii) permits Seller to participate and to defend if Seller requests to do so, and (iii) gives Seller all needed information, assistance and authority. However, Seller will not be responsible for infringements resulting from anything not entirely manufactured by Seller, or from any combination with products, equipment, or materials not furnished by Seller. Seller will have no liability with respect to intellectual property matters arising out of products made to Buyer's specifications, code, or designs. Except as expressly stated in this Paragraph 8 or in another writing signed by an authorized officer, Seller makes no representations and/or warranties with respect to intellectual and/or industrial property and/or with respect to claims of infringement. Except as to claims Seller agrees in writing to defend, BUYER WILL INDEMNIFY, DEFEND AND HOLD HARMLESS SELLER FROM ALL CLAIMS, COSTS, LOSSES, AND DAMAGES (INCLUDING ATTORNEYS' FEES) AGAINST AND/OR ARISING OUT OF GOODS SOLD AND/OR SHIPPED HEREUNDER.

### 9. NO CONFIDENTIAL INFORMATION

Seller shall have no obligation to hold any information in confidence except as provided in a separate non-disclosure agreement signed by both parties.

### 10. ENTIRE AGREEMENT

- These terms and conditions are the entire agreement and the only representations and understandings between Seller and Buyer, and no addition, deletion or modification shall be binding on Seller unless expressly agreed to in a writing signed by an officer of Seller.
- Buyer is not relying upon any warranty or representation except for those specifically stated here.

### 11. APPLICABLE LAW

The contract and all performance and disputes arising out of or relating to goods involved will be governed where Seller is ITE Taiwan by the laws of Taiwan, Republic of China or, where Seller is ITE California, by the laws of California and the United States of America, in either event without reference to the U.N. Convention on Contracts for the International Sale of Goods or to conflict of laws principles. Buyer agrees at its sole expense to comply with all applicable laws in connection with the purchase, use or sale of the goods provided hereunder and to indemnify Seller from any failure by Buyer to so comply. Without limiting the foregoing, Buyer certifies that no technical data or direct products thereof will be made available or re-exported, directly or indirectly, to any country to which such export or access is prohibited or restricted under U.S. law or regulations, unless prior authorization is obtained from the appropriate officials and agencies of the government as required under U.S. laws and regulations.

### 12. JURISDICTION AND VENUE

Where Seller is ITE Taiwan, the courts located in Hsinchu, Taiwan, Republic of China, will have the sole and exclusive jurisdiction and venue over any dispute arising out of or relating to the contract or any sale of goods hereunder. Where Seller is ITE California, the courts located in Santa Clara County, California, USA, will have the sole and exclusive jurisdiction and venue over any dispute arising out of or relating to the contract or any sale of goods hereunder. Buyer hereby consents to the jurisdiction of such courts.

### 13. ATTORNEYS' FEES

Reasonable attorneys' fees and costs will be awarded to the prevailing party in the event of litigation involving and/or relating to the enforcement or interpretation of the contract and/or any goods sold under it.
