DT 375 ISA Internal Lightpen Interface

INTERNAL INTERFACE FEATURES

Quick and easy installation

All digital design for increased reliability

Jitter-free performance

Single pixel accuracy

Single pixel resolution in Super VGA mode

The MicroSpeed DT 375 is an internal ISA Bus light pen system that includes a triple switch light pen *(nosetip and two side switches)*. The DT 375 offers maximum user convenience with programmable switches. Left and right mouse button emulation or a double-click operation is available with the single touch of a side switch. The DT 375 delivers immediate tactile feedback to users during the switch actuation process to guarantee increased input accuracy and user confidence. This aluminum barrel light pen, unlike a mouse, is as easy to use as putting pen to paper. With a lower initial cost and

SPECIFICATIONS

INTERFACE DIMENSIONS	W 3" x L 5"
PACKAGE DIMENSIONS	W 10" x L 7.5" x D 3.75"
CONNECTORS	2 RJ11 - one for light pen, other for sync cable (to go between graphics card and monitor)
COMPATIBILITY	IBM PC or compatible

lower maintenance than touch screens, the DT 375 is a natural direct input device.

Intuitive like a touch screen, a single switch nosetip light pen operates directly against the face of the computer screen. The light pen operates without expensive special screens or clumsy overlays, does not experience calibration drift and does not leave greasy finger print marks on the monitor screen. The DT 375 light pen works through enclosures
