

Chapter 1 Introduction

1.1 Introduction

Congratulation on choosing the internal modem. From now, you are just adding a very important communication function to your PC. This Motorola SoftModem use the most advanced chip set made by Motorola, which can increase CPU usage and reduce the cost of purchasing modems. Same as other modems, the main purpose of this product is to assist your computer to connect to others or to the Internet through the phone line. Meanwhile, it can also support fax and voice. By using the product, you not only can use your PC as a facsimile machine but also can use your PC to talk or transfer your incoming calls into voice mailbox. Thanks for purchasing our products again. We truly hope that it can meet your satisfaction.
