## 1. Description

The Dual Serial Card is a mini size add-on card for IBM PC, XT, AT, 386 and 486 systems with two serial ports for connecting the system with serial devices such as modem, mouse, digitizer, serial plotter and serial printer.
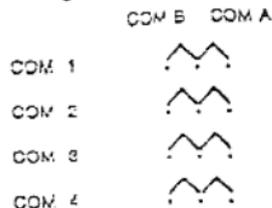

2. Feature

. Two RS-232 serial ports, one can be optional.
. Each serial port can be set to COM1, COM2, COM3, or COM4.
. Each serial port can use IRQ3 or IRQ4.
. Easy I/O address and IRQ setting, all ports can be disabled.
. Mini size and low power consumption.

3. Board Layout

4. Setting the I/O Address (JP1)

5. Setting the IRQ (JP2)

6. Standard I/O Address and IRQ Setting

Port Name	COM 1	COM 2	COM 3	COM 4
