SoundMaker Live 5.1/DVD
.1-Channel PCI Audio Acceleration Card

The Genius **Sound Maker Live 5.1** and **Sound Maker Live 5.1 DVD** are high-performance 5.1-channel PCI audio acceleration cards that are used for home theater quality sound. They can interactively position audio in 3D space around the listener using **Q3D Interactive technology**. A unique 2D to 3D positional remapping technology allows 2D applications to be played in full positional 3D. Stereo playback can also be enhanced to reproduce an output signal with dramatically widened stereo imaging and enhanced realism.

Plus, they support popular A3D games and **Microsoft DirectSound3D** acceleration to immerse players with positional 3D sound. Also bundled in both packages is the YAMAHA XG5 software WaveTable program are also bundle.

In addition, the **Sound Maker Live 5.1 DVD** is bundled with **PowerDVD Pro6** to read DVD titles and support powerful Dolby AC3 sound effects; and **Medi@Show**, a vivid presentation software, so you can enjoy the best video and sound experience available

Q3DInteractive Positional 3D Sound	A3D and DirectSound3D applications support	XG Software Wavetable

Features ----

- Multi-speaker audio output up to **six speakers**
- **32-bit** PCI-based, plug and play
- Supports Analog/Digital/**Force Feedback** joystick port
- Superior **Q3Dinteractive** positional 3D sound
- Supports **Microsoft DirectSound, DirectInput** Acceleration
- Supports **Windows XP/Me/2000**/98/95/NT4.0, DOS 6.2, Sound
- Bundled with **PowerDVD Pro6** and **Medi@Show** software (DVD version only)

Specifications ----

- Multi-speaker audio output up to **six speakers**
- **32-bit** PCI-based, plug and play
- Superior **Q3Dinteractive** positional 3D sound
- Supports **Microsoft DirectSound, DirectInput** Acceleration
- **XG** software WaveTable Synthesizer
- **MPU-401 UART** mode MIDI interface
- Bundled with **PowerDVD Pro6** and **Medi@Show** software (DVD version only)
- Sound Blaster/ Pro emulation
- Systems requirements:
  - IBM PC Pentium II-266, or K6-2 300 compatible or higher
  - Available PCI bus slot
  - Microsoft Windows XP/Me/2000/98/95/NT4.0, DOS 6.0 or higher
  - Microsoft DirectX6.0 or later
  - Minimum 40MB of free hard disk space
  - Minimum 32MB on-board memory
  - CD-ROM drive and audio cable
  - Amplified Speakers for audio output

Package Contents ----

- Sound card
- CD-ROM utilities
- User's manual
- 9 pin audio cable
