It seems manuals omit gameport pinout, which has an unusual number of pins. So I've checked the traces. It turns out the header only supports a single joystick (only 2 analog inputs). Pinout for v2.11:

Routed to nearby Winbond W83768 (U20),
measured by hand (maybe incomplete)

```
pin
1      5v
2      gbo0 pin 31, button in
3      gpc0 pin 11, analog in
4      gnd
5      gnd
6      gpo1 pin 10, analog in
7      gbo1 pin 30, button in
8      5v
9      ?n/c
10     ?n/c
```
