

# AcerAltos™ 9000

The powerful Intel® Pentium® processor-based, PCI-bus AcerAltos 9000 is designed specifically for businesses with demanding networking needs. Onboard PCI SCSI and SVGA graphics controllers allow for an additional four PCI, two EISA, and one shared slot. The 12-bay modular tower includes an 8-bay Drive Tray Management System (DTMS) for easy-access, and hot-plug storage which can be easily upgraded to RAID 5. An integrated split-channel SCSI back-plane provides an even higher level of fault-tolerant reliability. The affordable AcerAltos 9000 is the ideal mid-range file and application server solution
