Disabled	16MB	16MB	16MB	16MB	64MB

Use 1MB, 4MB, or 16MB 80NS Fast page mode 72-pin SIMMS
 Bank 0 & 1 must have the same memory SIMM installed
 Bank 2 & 3 must have the same memory SIMM installed

Acer V6 Motherboard

Upgrade Math-Coprocessor

The V6 System 486Sx/25MHz has no socket for the math-coprocessor. To get the math coprocessor option feature, one must upgrade to the 486DX/33 MHz or higher CPU.

Video Memory

The onboard VGA RAM can be upgraded from 512K to 1MB. Order four 256K x 4, 80NS DRAM chips.

Cache

The system supports second-level cache upgrade sizes of 64K, 128K, and 256K.

<u>Description</u>	<u>Part Number</u>
64K CACHE, 8415-064	91.40410.001
128K CACHE, 8415-128	91.40410.002
256K CACHE, 8415-256	91.40410.003

NOTE: These cache boards are no longer manufactured.

Daughter Board

The Daughter board has four 16-bit ISA slots with a Male 16-bit MCA slot for connection to CN18 on the motherboard.
