

***ATXS-5000P***  
***Long Life Quad Core***  
***Industrial Server Board***

Revision A

**Quick Start Guide**

**Intel® Xeon Quad Core E5300**

**Embedded Processors**

**Intel 5000P Chipset**

**Warranty**

The product is warranted against material and manufacturing defects for two years from date of delivery. Buyer agrees that if this product proves defective Chassis Plans is only obligated to repair, replace or refund the purchase price of this product at Chassis Plans' discretion. The warranty is void if the product has been subjected to alteration, neglect, misuse or abuse; if any repairs have been attempted by anyone other than Chassis Plans; or if failure is caused by accident, acts of God, or other causes beyond the control of Chassis Plans. Chassis Plans reserves the right to make changes or improvements in any product without incurring any obligation to similarly alter products previously purchased.

In no event shall Chassis Plans be liable for any defect in hardware or software or loss or inadequacy of data of any kind, or for any direct, indirect, incidental or consequential damages arising out of or in connection with the performance or use of the product or information provided. Chassis Plans' liability shall in no event exceed the purchase price of the product purchased hereunder. The foregoing limitation of liability shall be equally applicable to any service provided by Chassis Plans.

**Return Policy**

Products returned for repair must be accompanied by a Return Material Authorization (RMA) number, obtained from Chassis Plans prior to return. Freight on all returned items must be prepaid by the customer, and the customer is responsible for any loss or damage caused by common carrier in transit. Items will be returned from Chassis Plans via Ground, unless prior arrangements are made by the customer for an alternative shipping method.

To obtain an RMA number, call us at (858) 571-4330. We will need the following information:

- Return company address and contact
- Model name and model # from the label on the back of the board
- Serial number from the label on the back of the board
- Description of the failure

An RMA number will be issued. Mark the RMA number clearly on the outside of each box, include a failure report for each board and return the product(s) to our San Diego, CA facility:

Chassis Plans  
10123Carroll Canyon Road  
San Diego, CA 92131  
Attn: Repair Department

**TRADEMARKS**

IBM, PC/AT, VGA, EGA, OS/2 and PS/2 are trademarks or registered trademarks of International Business Machines Corp.

Intel is a registered trademark of Intel Corporation.

Speaker	<b>Buzzer1</b>	On Board VGA Enable	<b>JP4</b>

## Jumper Setting

### 1. CMOS Clear

CLR_CMOS1	Options	Settings
	Normal	Short 2-3 (Default)
	Clear CMOS	Short 1-2

### 2. Force System PWR On

JP15	Options	Setting
	Force Power on	Short
	Normal	Open(Default)

### 3. COM4 Function Selection

	JP9	JP10	JP11	J24
RS232(Default)	Close	Open	Open	Close(1-2,3-4,5-6,7-8)
RS422	Open	Open	Close	Open
RS485	Open	Close	Close	Open

### 4. Power Selection for IDE2

JP3	Options	Settings
	+3.3V	Short 2-3
	+5V	Short 1-2(Default)

## 5. BIOS Write Protection

JP14	Options	Setting
	Write Protection Enable	Short
	Normal	Open(Default)

## 6. On Board VGA Disable/Enable

JP4	Options	Setting
	Enable On Board VGA	Short(Default)
	Disable	Open

## Header Pin Description

### 1. Front Panel: F\_Panel1

Pin	Description	Pin	Description
1	HDD LED +	2	Power LED +
3	HDD LED -	4	Power LED -
5	System Reset -	6	Power Button -
7	System Reset +	8	Power Button +
9	VCC	10	NC
11	NC	12	NC
13	5VSB	14	NC
15	SMBDATA	16	GND
17	SMBCLK	18	Intrude_Det

### 2. Front COM Port: COM2-4

Pin	Description	Pin	Description
1	DCD (Data Carrier Detect)	2	DSR (Data Set Ready)
3	RXD (Receive Data)	4	RTS (Request to Send)
5	TXD (Transmit Data)	6	CTS (Clear to Send)
7	DTR (Data Terminal Ready)	8	RI (Ring Indicator)
9	Ground	10	NC

### 3. Front USB - F\_USB1, F\_USB2

Pin	Description	Pin	Description
1	VCC	2	VCC
3	USB0 -	4	USB1 -
5	USB0 +	6	USB1 +
7	Ground	8	Ground
9	NC	10	Ground

### 4. IDE Port - IDE1/IDE2

**Note:** IDE1 and IDE2 share one IDE channel. IDE1 and IDE2 connectors can support one IDE device per connector. One device will be configured as master, and the other configured as slave.

### 5. Front Audio Header: Front\_Audio1

Pin	Description
1	MIC Left
2	GND
3	MIC Right
4	Present
5	SPK_R
6	Mic_JD
7	Sense
8	NC
9	SPK_L
10	SPK_JD

## FBD DIMM Configuration

**Note:** Insert the DIMMs into the Memory Sockets in pairs, starting with DIMM slot 1A, which is close to the North Bridge, or following the configuration table below. Populating DIMM modules with same size and same type will increase the system performance. Some OS can not support more than 4GB memory space.

Number Of DIMMs	1A CON1	1B CON2	2A CON3	2B CON4	3A CON5	3B CON6	4A CON7	4B CON8	Optimal
1 DIMM	Ok								Yes
					Ok				Yes
2 DIMMs	Ok	Ok							
					Ok	Ok			
	Ok		Ok						
	Ok				Ok				Yes
4 DIMMs					Ok		Ok		
	Ok	Ok			Ok	Ok			Yes
					Ok	Ok	Ok	Ok	
	Ok		Ok		Ok		Ok		Yes
6 DIMMs	Ok	Ok	Ok	Ok	Ok		Ok		Yes
	Ok		Ok		Ok	Ok	Ok	Ok	Yes
8 DIMMs	Ok								

## CPU Installation

**Note:** Please remove the power cord before adding, removing or changing any hardware components.

Make sure that the two Xeon CPUs you want to install are the same type and speed.

Make sure that ATX power (J17)/ATX12V power (ATX12V1)/CPU power (J18) are all connected to the Power Supply before powering on the system.
