

**Q : Why the mouse plug at COM1 position, but windows show at COM2 in P6F139?**

**A : It's due to we use different address for COM1 and COM2.If you want to see general position, please follow the step as below:**

**Step 1: Enter item "Integrated Peripherals" in the BIOS setup**

**Step 2: Change item " Onboard Serial Port1 : 3F8/IRQ4 " to "Onboard Serial Port1 : 2F8/IRQ3"**

**Step 3: Change item " Onboard Serial Port2 : 2F8/IRQ3 " to "Onboard Serial Port2 : 3F8/IRQ4"**
