# DFI Ez-Flash Application user guideline :

Flash BIOS from bin file:

Please download the needed BIOS .zip file from DFI official website, unzip it and copy all the unzipped files(normally two or three files) to the same folder.

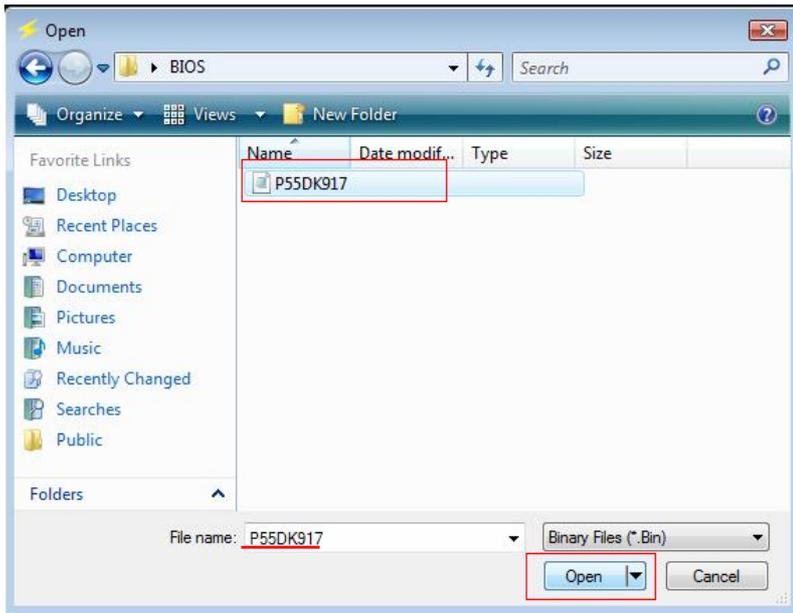

Please click below logo to run the BIOSecure application.

Please load the bin file to the system memory buffer in "Load".

Please Choose correct bin file.

Show the ROM file ID.

Please choice the item to flash BIOS.

The AP will program the ABS Profile & BIOS bin file.

Please click "exit" to run flash the BIOS .

The AP will show below message when the BIOS flash success.

Backup BIOS file from device:

Please click the "Save" button to read the BIOS file from SPI device to the system memory buffer.

Please enter a file name to save it.

To double check the BIOS file.
